

Open Access at UCLan

To ensure your research meets [University](#), and funder Open Access policies (including the [HEFCE REF](#)), **all** research outputs must be deposited on [CLOK](#) as soon as possible after **acceptance** for publication, or as soon as they are made publicly available.

What you need to do:

- ⇒ Create a record of your work on CLOK (<http://clock.uclan.ac.uk/>)
- ⇒ As a minimum you **must** include these five pieces of information:
 - * The authors' names, at least one must be UCLan student or staff
 - * The title of the work
 - * A date - the [date of acceptance](#) of a published work; for unpublished or non-texts works, the date of creation or public availability
 - * The digital object identifier (DOI), a publisher or journal URL or any page that gives more information about the work if the above are not available
 - * Full-text or equivalent

The more information you add, the more discoverable your research will be.

What the Open Access Team will do:

- ⇒ Review the record for University and funder compliance
- ⇒ Add [copyright licence](#) and full-text embargo in line with your publisher's requirements
- ⇒ Approve/ release the CLOK record (you will be sent an email to notify you when this has happened)

Further information and support:

Follow the links for further information, or contact your Open Access Support and Advocacy Officer (openaccess@uclan.ac.uk).
