Achilles Tendon Problems
Dr Marwan Al-Dawoud
ELHT Musculoskeletal Service

• Affects more than 150,000 people every year
• Current evidence is based on small numbers of sporting population

• We wish to evaluate on a large general population scale:
  • The risk factors: diabetics, metabolic syndrome, cholesterol, inflammatory arthropathy, gout, CV disease
  • Does sleep and mental health have an impact?
  • What is the role of imaging and injections and at what stage?
  • What is the best rehabilitation?

• Looking for academic partnership
