Winning design for nurses on-line

Pupils at a Preston school have come up with an award winning design to help promote an innovative new project aimed at providing on-line resources for nurses.

Year Ten students at Priory Technology College, Penwortham, were asked to come up with a suitable logo for the Students On-line in Nursing Integrated Curricula (SONIC) project, as part of their GCSE art portfolio. Overall winner was Charlotte Lepre-Slater, with Rachel Gibson and Jenny Ng getting second and third prizes.

The SONIC project is being delivered by a consortium of nursing departments in four universities, including the University of Central Lancashire. As a problem-based learning method (PBL), it encourages nursing students to use web-based learning materials, including practical case studies, to help them in their studies and in day-to-day work situations. Priory Technology College was recruited to help project directors in their aim to publicise the scheme more widely throughout the country.
